

Sr. Project Manager/Land Development Consultant/ Loveland Colorado

Westwood Professional Services

Westwood Professional Services is seeking a Registered Civil Engineer with demonstrated experience in land development for our Loveland, Colorado office. Westwood is a national land and energy consulting firm based in Minneapolis, Minnesota. The firm has a highly experienced and dynamic team of individuals dedicated to providing high-level design and engineering services for private-sector clients.

Responsibilities:

Qualified individuals will assist clients in the development, design, approvals and construction of site improvements for residential, commercial and energy projects.

Individual will be required to serve as the primary client liaison, manage multi-disciplined teams, and be responsible for securing new work and profitably managing projects.

Qualifications:

Candidate must have a degree in Civil Engineering and a professional engineering license (PE) in Colorado (or ability to secure licensing within 3 months). In addition, 10 plus years of engineering and project management experience in site development projects related to site layout, site grading, hydrologic, and utility and street improvements is required.

The position requires a demonstrated history of successful projects with a portfolio including large-scale site developments with local and national clients. Also required are team leadership experience and strong technical, communications and interpersonal skills.

Interested Candidates should submit a resume and cover letter with salary expectations to:
