

Civil Engineer— Project Manager

Fort Collins, Colorado

Civil engineering consulting firm is looking for a civil engineer generalist for growing, well established Ft Collins, CColorado office. The civil engineer will serve in a seller/ doer role to manage existing and new projects in addition to assisting in helping the office to bring in new work. Prior experience working in Colorado is highly desirable including prior experience with local, state and national regulations. The individual will assist with business development and marketing in the Northern Colorado area through current and new relationships. In addition, the individual will oversee and perform engineering functions. The office currently works on a diverse group of engineering projects including water resources, aviation, military and federal projects.

The company is a smaller, multi-state employee-owned engineering consulting firm with a growing Northern Colorado office. Relocation will be provided for the right individual!

Requirements:

- Bachelors degree in Civil Engineering
- 5-15 years of experience
- Licensed Professional Engineer in the State of Colorado (or ability to obtain through reciprocity)
- Prior project management experience overseeing a diverse type of projects.
- Ability to function successfully in a smaller office environment with the ability to work on a wide variety of civil engineering projects
- Prior small/mid-size company experience is preferred
- Professional Organization involvement is highly desirable
