

# 20 | Professional 16 | Engineers

CONFERENCE INNOVATE. LEAD. CHANGE THE WORLD.

Few people can call themselves both a *professional* and an *engineer*. But if you are a professional engineer or aspire to become one, you won't want to miss the 2016 Professional Engineers Conference from June 22–26 in Dallas. Attendees will be able to connect with like-minded professionals, earn continuing education credits, and explore the ways professional engineers can help shape the future.
