

Engineer III (Water/Wastewater)

Are you ready to take the next step in your career? Are you an individual who takes pride in delivering exceptional work? We are currently seeking a self-motivated engineer with 3-7 years of experience to join us supporting the Water and Wastewater Engineering Group in our Denver, CO office.

When you join Brown and Caldwell you will enjoy a unique and welcoming culture. You will find that we offer a non-hierarchical, collaborative, and supportive environment, allowing you to do your best work. You will be trusted to do the right thing by our project managers and external clients and given the flexibility to manage your own schedule to achieve this. The work we do is interesting, challenging and wide-ranging in nature, and so is our client base.

Job Expectations:

In this role you will provide support on a variety of engineering projects with a focus on water and wastewater treatment plant planning, design and construction. Specific duties may include the following:

- Conduct technical evaluations to support planning and design related to water and wastewater systems including unit processes, planning and pumping systems.
- Assist with the preparation and review of technical memoranda, reports, drawings, specifications, and miscellaneous contract documents.
- Assist with project management activities for select tasks and develop PM skills for expanded responsibilities and internal PM assignments.
- Support field testing and investigations when required.
- Help mentor junior level staff members.
- Provide technical marketing support during the procurement of key projects as requested.
- Support construction projects with office engineering services (submittal review, contract document interpretation) when required.

Desired Skills and Experience:

- Bachelor's degree in Civil/Environmental Engineering or related engineering field required; Master's degree preferred.
- Candidates are required to have at a minimum an EIT and be preparing to take and secure a PE license in the state of CO. Already having a PE license a plus.
- Minimum of 3 years of increasingly-responsible, professional experience in the study, design, and construction administration of water and wastewater facilities; 3 to 7 years' experience desired.
- Demonstrated task or project management leadership and delivery.
- Should be self-starter, versatile and interested in working on a variety of projects supporting the Engineering Group.

- Demonstrated experience in preparation of engineering calculations and equipment selection including hydraulics and pumping systems at a minimum.
- Successful marketing, proposal writing, proposal management, and public presentations experience a plus.
- Excellent technical writing and communication skills required.
- Demonstrated proficiency in organization and presentation of documentation.
